

AIMS

(AI-Driven Medical Solutions)

PROBLEM STATEMENT

- Fragmented healthcare data management
- Time-consuming patient onboarding
- Inefficient reporting systems

TARGET MARKET

- Healthcare professionals (Doctors, Nurses, staff)
- Small to large clinics
- Clinics looking for advanced AI-integrated systems

CUSTOMER MARKET

- Healthcare providers and clinics
- Hospitals and medical institutions
- Doctors seeking tech-driven patient management solutions

BUSINESS CONCEPT

- Seamless EHR-API integration for smooth information flow
- AI-powered real-time transcription for accurate medical records
- Dynamic patient report generation

UNIQUENESS

- AI-powered tools for real-time transcription (Deepgram, Whisper)
- Voice-activated and OCR-enabled patient onboarding
- Intelligent meeting summaries for collaborative healthcare
